

ABSTRACT OF DISCLOSURE

A notebook computer that can support various frequency bands with an internal-type antenna. The notebook computer includes a display device 20 to display an image, a case 30 installed on the outside of the display device 20 and formed with an antenna groove 32 on a front side thereof, an antenna 40 provided in the antenna groove 32 of the case 30, and a cover 50 attached to the case 30 and covering the front side of the case 30 housing the antenna 40. The case and the cover can be attached by a simple combining structure, to prevent and/or minimize the space and/or the gap that may occur when they are attached.
